PROCEEDINGS OF THE 23RD INTERNATIONAL CONFERENCE ON COMPUTERS AND INDUSTRIAL ENGINEERING

Sabah U. Randhawa 1 Editor's Note

Mohamed I. Dessouky 3 Dr. Hamed Kamal Eldin 1924–1997

PRODUCT DESIGN

Parveen S. Goel and **Nanua Singh** 5 Creativity and innovation in durable product development

Hwa Gyoo Park, Young Nam Kim, Gyu Sang Lee and **Hyun Kim** 9 A simultaneous design modeling support system

Peter O'Grady and **Wen-Yau Liang** 13 An Internet-based search formalism for design with modules

Hwa Gyoo Park and **Jun Seok Lee** 17 An expert classification system for production system

Kwan H. Lee and **H. Woo** 21 Use of reverse engineering method for rapid product development

Saeid Motavalli 25 Review of reverse engineering approaches

Lars Hvam 29 The Rulers Factory—a tool for learning product modeling techniques

MANUFACTURING—MECHANICAL

Manocher Djassemi 33 A parametric programming technique for efficient CNC machining operations

P. T. Huang and **J. C. Chen** 37 Fuzzy logic-base tool breakage detecting system in end milling operations

Bo Zhang and **Frank Plonka** 41 Optimization of work loading for the die and tool shop

J. K. Spoerre and **K. N. Kendall** 45 Modeling and optimization of thermoplastic composites stamping process

M. A. Younis 49 On line surface roughness measurements using image processing towards an adaptive control

MANUFACTURING—ELECTRONICS

Zhongkai Xu, Ken Carlson, Richard Kurschner and **Sabah Randhawa** 53 An integrated methodology for surface mount PCB configuration

Chan-Jer Yang, K. Srihari and **J. DiLella** 57 Issues that impact the conversion to a no-clean surface mount assembly process

S. Ramakrishnan, K. Srihari and **G. R. Westby** 61 A decision support system for the alternative assembly and reflow technology process

Pitipong Veerakamolmal and **Surendra M. Gupta** 65 High-mix/low-volume batch of electronic equipment disassembly

CELLULAR MANUFACTURING

David Ben-Arieh 69 Analysis of a distributed group technology methodology

Geonwook Jeon, Marc Broering, Herman R. Leep, Hamind R. Parsaei and **Julius P. Wong** 73 Part family formation based on alternative routes during machine failure

J.-T. Chen and **A. Thesen** 77 Performance estimation of a manufacturing cell using rotation scheduling

Jun Wang 81 A linear assignment algorithm for formation of machine cells and part families in cellular manufacturing

Gürsel A. Süer and **Ivan Sanchez Bera** 85 Multi-period cell loading and cell size determination

Kanton T. Reynolds 89 Cellular manufacturing and the concept of total quality

PRODUCTION SCHEDULING

Elif Kizilkaya and **Surendra M. Gupta** 93 Material flow control and scheduling in a disassembly environment

Wu Xiao Bing	97	Analytic process of resource: a practical approach for scheduling
Charlambos A. Marangos, Vinay Govande, G. Srinivasan and **Emory W. Zimmers, Jr**	101	Algorithms to minimize completion time variance in a two machine flowshop
Lin Gao, Chengyao Wang, Dingwei Wang, Zhisong Yin and **Shuning Wang**	105	A production scheduling system for parallel machines in an electrical appliance plant
Mohamed I. Dessouky, Richard L. Marcellus and **Li Zhang**	109	Scheduling indentical jobs on uniform parallel machines with random processing times
Kuo-Ching Liu	113	Dispatching rules for stochastic finite capacity scheduling
Y.-C. Eric Li and **Wade H. Shaw**	117	Simulation modeling of a dynamic job shop rescheduling with machine availability constraints
Wai Ki Ching	121	A production model with delivery time guarantees for manfacturing systems with early set-up

OPERATIONS MANAGEMENT

Dan Ziegler, Dennis Markopoulos, Lisa Steffens and **Tony Chou**	125	Dynamic workflow changes: a metadata approach
Muzaffar A. Shaikh	129	A 'peak shaving' approach to project staff reallocation
Neal F. Schmeidler and **John J. D'Avanzo**	133	Technique to evaluate impact of new technology on operator time loading
Tanju Yurtsever and **Neal G. Pierce**	137	Computerized manufacturing monitoring and dispatch system
Sekar Sundararajan, G. Srinivasan, Walt O. Staehle and **Emory W. Zimmers, Jr**	141	Application of a decision support system for operational decisions
Aybek Korugan and **Surendra M. Gupta**	145	A multi-echelon inventory system with returns
Wai Ki Ching	149	A model for multi-location inventory problems
Q. Zhou, P. Souben and **C. B. Besant**	153	An information management system for production planning in virtual enterprises

Hwa Gyoo Park, Young Nam Kim, Chun Sik Kim, Sung Jin Park, Jong Myung Baik and **Chan Ho Lee**	157	An object oriented production planning system development in ERP environment
Askiner Gungor and **Surendra M. Gupta**	161	Disassembly sequence planning for products with defective parts in product recovery
Kendra E. Moore, Askiner Gungor and **Surendra M. Gupta**	165	A Petri net approach to disassembly process planning
Wu Xiao Bing	169	The application of analytic process of resource in an AGV scheduling
Craig M. Harvey and **Richard J. Koubek**	173	Toward a model of distributed engineering collaboration

PROCESS AND QUALITY CONTROL

Sezai Dogdu and **D. L. Santos**	177	The paradigm shift in statistical process control due to the latest developments in computer technology
Shing I. Chang and **Jerry V. J. Visser**	181	A framework of distributed quality control
A. S. Anagun	185	A neural network applied to pattern recognition in statistical process control
M. Xie, T. N. Goh and **X. S. Lu**	189	Computer-aided statistical monitoring of automated manufacturing processes
S. M. Alexander and **T. B. Gor**	193	Monitoring, diagnosis and control of industrial processes
Yubao Chen and **Chia-Hao Chang**	197	Reliability improvement of paper feeder by the integrated robust design and control approach
Y. Zhang, Y. S. Low and **X. D. Fang**	201	PCI-based tolerance as an interface between design specifications and statistical quality control
Mustafa Sefik	205	Importance of the rational subgroups in designing control charts
T. Paul Robert and **Pratheeba Victor**	209	Irrigation process optimization using Taguchi orthogonal experiments
S. L. Ho and **M. Xie**	213	The use of ARIMA models for reliability forecasting and analysis

TOTAL QUALITY MANAGEMENT

Antonie van Rensburg	217	A framework for business process management
C. L. Yeung and **L. Y. Chan**	221	Quality management system development: some implications from case studies
Rajesh Jugulum and **Mustafa Sefik**	225	Building a robust manufacturing strategy
Soumaya Yacout and **Jacqueline Boudreau**	229	Assessment of quality activities using Taguchi's loss function
Jae Kyeong Kim, Chang Hee Han, Sang Hyun Choi and **Soung Hie Kim**	233	A knowledge-based approach to the quality function deployment
Ming Zhou	237	Fuzzy logic and optimization models for implementing QFD
Chang Hee Han, Jae Kyeong Kim, Sang Hyun Choi and **Soung Hie Kim**	241	Determination of information system development priority using quality function development
Soumaya Yacout, Patrick Bourbonnais and **Jacqueline Boudreau**	245	Integrating ISO 9000 with HACCP programs in seafood processing industry
G. G. Grace, L. Massay and **S. J. Udoka**	249	Total quality systems: using a multidisciplinary preparation course for teaching quality improvement

NFORMATION TECHNOLOGY

Sameer S. Pradhan and **Wilfred V. Huang**	255	Virtual manufacturing information system using JAVA™ and JDBC™
A. A. Gokhale	259	Enterprise-wide networking for manufacturing
Jiaomin Liu and **Jianguo Lu**	263	Design computer network by using powerline
Stuart H. Rubin	267	A fuzzy approach towards inferential data mining
David Koonce, Lizhong Huang and **Robert Judd**	271	EQL an express query language
Gil Haeng Lee, Jae Yong Lee, Chi Jung Hwang, Wang Don Woo and **Byung Nam Yoon**	275	Implementation and performance analysis of a TMN system for public ATM networks

Dong-Hee Lee, Jong-Tae Park, Kil-Haeng Lee and **Wang-Don Woo** — 279 A hybrid mechanism for the efficient restoration of ATM networks

Jianzhong Sun, Jian Jia and **Yunfeng Wang** — 283 M/M/M/AMIS and its application

DECISION ANALYSIS

Gary Gang Jing, Ali Houshmand, Anca Ralescu and **José Arantes** — 287 Tuning the linear membership functions in spreadsheets to improve the quality of multi-factor fuzzy inference

Chien-Lung Chan and **Ching-Chien Chang** — 291 A method combining MAU and fuzzy logic for cooperative decision making

Jae Kyeong Kim, Sang Hyun Choi, Chang Hee Han and **Soung Hie Kim** — 295 An interactive procedure for multiple criteria group decision making with incomplete information

Sang Hyun Choi, Byung Seok Ahn, Chang Hee Han, Soung Hie Kim and **Jae Kyeong Kim** — 299 Knowledge-based decision system for goal directed military resource planning

Juan Ramos, Lorena Bearzotti, Enrique Milani, Federico Woscoff, Mariana Gorsky, Carlos M. Carletti, Ma. R. Galli and **Omar Chiotti** — 303 Decision support systems generator for industrial companies. Module I: product design support system

Griselda Castro, Leonardo Gregoret, Walter Delfabro and **Omar Chiotti** — 307 Decision support systems generator for industrial companies. Module II: system to support the material management

Pablo Rossi, Clara Díaz, Pablo Fruttero, César Vittori, Mariela Rico and **Omar Chiotti** — 311 Decision support systems generator for industrial companies. Module III: scheduling support system

Ma. Laura Caliusco, Pablo Villarreal, Alejandro Toffolo, Ma. Laura Taverna and **Omar Chiotti** 315 Decision support systems generator for industrial companies. Module IV: forecasting support system

APPLICATIONS IN OPTIMIZATION AND SIMULATION

C.-F. Chien and **W.-T. Wu** 319 A recursive computational procedure for container loading

K. K. Lai, J. Xue and **B. Xu** 323 Container packing in a multi-customer delivering operation

Sherif M. Waly and **Bhaba R. Sarker** 327 Noise reduction using nonlinear optimization modeling

Z. Q. Wang and **L. J. Xiao** 331 An optimal real time algorithm for determining the convex hull of a set of points in a plane

Sun Hur and **Seung-Jin Paik** 335 The effect of different arrival rates on the *N*-policy of M/G/1

S. Cem Karacal 339 Simulation of hierarchical manufacturing control

Yoon Ho Cho, Jae Kyeong Kim and **Soung Hie Kim** 343 Role-based approach to business process simulation modeling and analysis

G. Allen Pugh 347 A simulation study of the five/ten rule

APPLICATIONS IN ARTIFICIAL INTELLIGENCE: NEURAL NETWORKS AND GENETIC ALGORITHMS

A. S. Anagun and **I. Cin** 351 A neural network based computer access security system for multiple users

Hwa Gyoo Park, Young Chel Go, Gyu Sang Lee, Hyun Kim and **Sang Bong Park** 355 A modeling data conversion system as a CAD and CAM integration enabler

Yun-Chung Chu and **Jie Huang** 359 Solving the nonlinear regulator equations by a single layer feedforward neural network

Mitsuo Gen, Kenichi Ida and **Yinzhen Li** 363 Bicriteria transportation problem by hybrid genetic algorithm

Takao Yokota, Takeaki Taguchi and **Mitsuo Gen** 367 A solution method for optimal weight design problem of 10 bar truss using genetic algorithms

Takeaki Taguchi, Takao Yokota and Mitsuo Gen 373 Reliability optimal design problem with interval coefficients using hybrid genetic algorithms

Lixin Zheng, Takao Yokota and Mitsuo Gen 377 A solution method for a resistance circuit network design with optimal power consumption problem by using genetic algorithms

NUMBERS 3/4

SELECTED PAPERS FROM THE 22ND ICC&IE CONFERENCE

M. I. Dessouky and M. Sadek Eid xi A word from the editors

Samy E. G. Elias 381 Value engineering, a powerful productivity tool

M. Kuroda and K. Takeda 395 General structure and characteristics of quick response production system

Dileep R. Sule and Karthick Vijayasundaram 399 A heuristic procedure for makespan minimization in job shops with multiple identical processors

A. I. Abdelmola, S. M. Taboun and S. Merchawi 403 Productivity optimization of cellular manufacturing systems

Hassan A. M. Soltan 407 Forecasting method for weak trend quantities

M. Hamdy Elwany and Amr El Baddan 411 The sensitivity of jobshop due date lead time to changes in the processing time

M. H. Elwany, I. E. Korish, M. Aly Barakat and S. M. Hafez 415 Resource smoothening in repetitive projects

Georges Abdul-Nour, Serge Lambert and Jocelyn Drolet 419 Adaptation of JIT philosophy and kanban technique to a small-sized manufacturing firm; a project management approach

Hyun-Joon Kim and Yasser A. Hosni 423 Manufacturing lot-sizing under MRP II environment: an improved analytical model and a heuristic procedure

Kap Hwan Kim and Hong Bae Kim 427 The optimal determination of the space requirement and the number of transfer cranes for import containers

Gürsel A. Süer and Ivan Sanchez Bera 431 Optimal operator assignment and cell loading when lot-splitting is allowed

Devika Bommisetty, Mohamed Dessouky and **Larry Jacobs**	435	Scheduling collection of recyclable material at Northern Illinois University campus using a two-phase algorithm
Tadahiko Murata, Mitsuo Gen and **Hisao Ishibuchi**	439	Multi-objective scheduling with fuzzy due-date
N. S. Mohamed	443	Operations planning and scheduling problems in an FMS: an integrated approach
M. Khater	447	Optimal packing of transformer coil via dynamic programming
A. Sobhanallahi and **E. Shayan**	451	Effect of cell based team work in productivity improvement at a manufacturing company
Alojzij Sluga, Peter Butala and **Goran Bervar**	455	A multi-agent approach to process planning and fabrication in distributed manufacturing
Hassan S. Abdalla	459	A concurrent engineering constraint-based system
Ajay Joneja and **Neville K.-S. Lee**	463	Automated configuration of parametric feeding tools for mass customization
Gürsel A. Süer	467	Designing parallel assembly lines
L. McFetridge and **M. Yousef Ibrahim**	471	New technique of mobile robot navigation using a hybrid adaptive fuzzy-potential field approach
Medhat A. Moussa and **Mohamed S. Kamel**	475	Requirements and design of a grasping system for personal robots
Geonwook Jeon, Marc Broering, Herman R. Leep, Hamid R. Parsaei and **Julius P. Wong**	479	Part family formation based on a new similarity coefficient which considers alternative routes during machine failure
Soha Eid Moussa and **Mohamed Kamel**	483	A part-machine assignment algorithm for cellular manufacturing with machine capacity constraints
Ebrahim Shayan	487	Cellular design for injection moulding shop
Vito Albino and **A. Claudio Garavelli**	491	Some effects of flexibility and dependability on cellular manufacturing system performance
Jianxin Jiao, Mitchell M. Tseng, Vincent G. Duffy and **Fuhua Lin**	495	Product family modeling for mass customization
M. Yousef Ibrahim and **P. N. Brett**	499	New approach for on-line object identification in industrial processes

Behrokh Khoshnevis and **George Bekey**	503	Centralized sensing and control of multiple mobile robots
Homayoun Khamooshi	507	$(DP)^2SM$: a dynamic approach to resource constraint project scheduling
Pamela K. Lattimore, Joanna R. Baker and **Edward R. Clayton**	511	A nonlinear multiple criteria model base for the problem of balancing caseload risk in probation departments
M. Shaarawy, F. Abd Rabou and **H. Zorkta**	515	An improved public-key cipher system based upon Diophantine equation
M. Y. Ismail, M. El Baradie and **M. S. J. Hashmi**	519	Quality management in the manufacturing industry: practice vs performance
Takao Yokota, Takeaki Taguchi and **Mitsuo Gen**	523	A solution method for optimal weight design problem of the gear using genetic algorithms
R. Tavakkoli-Moghaddain and **E. Shayan**	527	Facilities layout design by genetic algorithms
Mitsuo Gen and **Yin-Zhen Li**	531	Spanning tree-based genetic algorithm for bicriteria transportation problem
Takeaki Taguchi, Kenichi Ida and **Mitsuo Gen**	535	A genetic algorithm for optimal flow assignment in computer network
P. Carvalho, N. Costa, B. Ribeiro and **A. Dourado**	539	Industrial visual inspection of lime granules by neural networks
Mitsuo Gen, Kenichi Ida and **Reiko Kobuchi**	543	Neural network technique for fuzzy multiobjective linear programming
Medhat A. Moussa	547	An experiment in approximating an end effector positional error of a 6 D.O.F. manipulator using neural network
Masood A. Badri, Ahmed Al-Mutawa and **Amr Murtagy**	551	Neural networks of data inhibiting long memory pattern
Gülser Köksal and **Yahya Fathi**	555	Design of economical noise array experiments for a partially controlled simulation environment
Hark Hwang and **Suk Lee**	559	Expected service time model for a rotary parking system
Chun-Hyun Paik	563	Throughput bounding and simple approximation methods for exponential fork/join queueing networks with blocking

Heung-Suk Hwang and **Jeong-Cheol Yu**	567	R&D project evalution model based on fuzzy set priority
K. Hashmi, M. A. El Baradie and **M. Ryan**	571	Fuzzy logic based intelligent selection of machining parameters
Hisao Ishibuchi, Tadahiko Murata and **Mitsuo Gen**	575	Performance evaluation of fuzzy rule-based classification systems obtained by multi-objective genetic algorithms
Ayman M. Wasfy and **Yasser A. Hosni**	579	Evolving efficient negotiation strategies using fuzzy logic based simulation
C. Moghrabi and **M. S. Eid**	583	Modeling users through an expert system and a neural network
Jürgen Bode and **Richard Y. K. Fung**	587	Cost engineering with quality function deployment
G. Abdul-Nour, H. Beaudoin, P. Ouellet, R. Rochette, S. Lambert	591	A reliability based maintenance policy; a case study
Walied A. Moussa	595	Risk-based reliability evaluation of multi-site damage in pipelines
So-Yeon Lee and **Jai-Sang Koh**	599	WWW-based reliability information system
Sayed M. Metwalli, Mona S. Salama and **Roushdy A. Taher**	603	Computer aided reliability for optimum maintenance planning
Tee Hiang Cheng	607	Performance comparison of 100Base-T Fast Ethernet and 100VG-AnyLAN
César D. Maciel and **Carsten M. Ritter**	611	TCP/IP networking in process control plants
C. J. Su, Benjamin P.-C. Yen and **X. Zhang**	615	An Internet based virtual exhibition system: conceptual design and infrastructure
M. M. Ayoub	619	A 2-D simulation model for lifting activities
Sumaira Rehman and **Marin D. Guenov**	623	A methodology for modelling manufacturing costs at conceptual design
S. W. Fong	627	Value engineering in Hong Kong—a powerful tool for a changing society
M. Yousef Ibrahim	631	Industry-based tertiary education of industrial automation: its pros and . . . pros

Chuan-Jun Su, Fuhua Lin and **Chao-Hsiang Su**	635	Syntactic interpretation approaches for innovative engineering drawings conversion support system
Gülser Köksal and **Alpay Eğitman**	639	Planning and design of industrial engineering education quality
Yves Beauchamp and Youssef A. Youssef	643	An effective approach to teach design of experiments (DOE) using calculation-and-analysis worksheets and computerized spreadsheets
W. Xu and **Z. Z. Shen**	647	An application study for digesting and renovating an imported production technology by means of I.E. methods
Marc Thomas and **Yves Beauchamp**	651	Development of a new frequency weighting filter for the assessment of grinder exposure to wrist-transmitted vibration
Kap Hwan Kim and **Jong Wook Bae**	655	Re-marshaling export containers in port container terminals
